

NETTING

PM Series Flat Sheet Netting

Flexible Series PM Net Sheetting provides excellent protection from impact or abrasion damage. Use as a separator for stacked parts during storage, handling and shipment, or as protective wrap for bulky items. Unlike wood, styrofoam or cardboard, it will not deteriorate in contact with solvents, coatings, slushing oils or rust-inhibitors.

MATERIAL: Low Density Polyethylene
COLOR*: See table on page 127

CSW Series Sleeve-Web® Netting

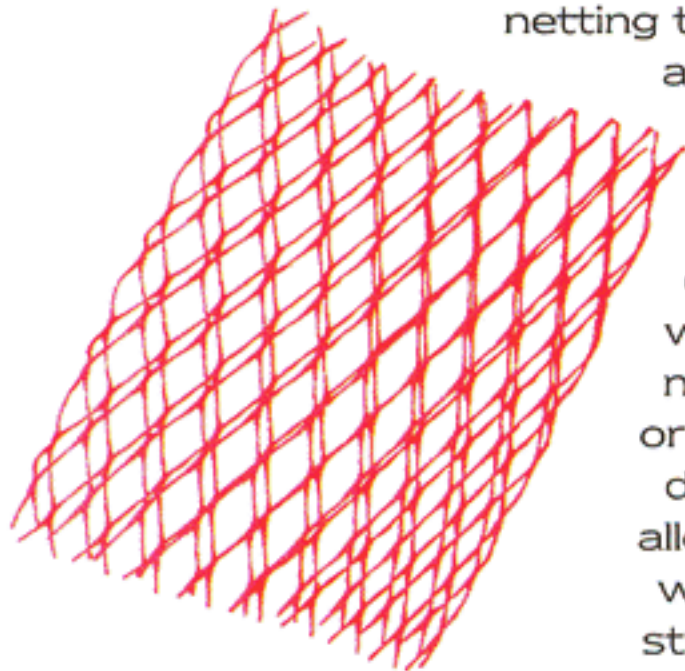

CSW Series Sleeve-Web® Netting conforms snugly around oxygen, acetylene and propane tanks, providing protection against unsightly scratches, minimizing rust build-up, and increasing time between repainting tanks. It also protects D.O.T.-mandated precautionary labels on gas cylinders from damage or accidental removal during handling.

MATERIAL: Low Density Polyethylene
COLOR*: Natural/Clear

CBW Series Cut Bottle-Web Netting

Series CBW is a tough yet flexible netting that provides surface and impact protection for bottles of any size and shape. Since the netting is extruded rather than woven, the strands will not separate, weaken or spread unevenly. The diamond mesh design allows for production in a wide range of strengths, stretch capabilities and elasticity to satisfy all types of protection needs.

MATERIAL: Low Density Polyethylene
COLOR*: Natural
